Summary

A passionate, self taught web developer with 2 years experience in front-end development. A natural problem solver with a desire to seek solutions, and the ability to multi-task to ensure projects are completed on time. Kevin possesses a meticulous eye for detail and can communicate ideas clearly to technical and non-technical audiences. Enthusiastic and committed with a pro-active approach to personal development.

Web Development Experience

2009 - Present **Freelance Web Developer (2years+) & Computer Technician(6 years+)**
99 Pixels (Self Employed)

- Responsible for the full development process of new websites, from initial concept and wire framing right through to completion.
- Writing cross browser compatible, easy to read, maintainable code.
- Reviewing code, fixing errors independently and in a timely manner.
- Adhering to modern build processes to bring efficiency to my workflow.
- Writing technical documents, user manuals and providing support to end users.
- Simultaneously managing several projects at any one time.
- Working alongside web designers to transform concepts into fully responsive websites.
- Adding functionality to already existing websites.
- Communicating with fellow developers to help resolve problems.
- Responsible for SEO and adjusting content to make it more search engine friendly.
- Using version control to develop concurrently.
